C. Cameron Station Punch Card Support:

Supply Management Branch has been asked by the Defense Logistics Agency at Cameron Station to provide information on the cost savings that would result from eliminating the punch card support they provide for us. This is needed to enable SMB to query the Federal Catalog Data Base. Punch card support involves an Agency courier hand carrying IBM punch cards to Cameron Station for transmittal over the AUTODIN communications channel to the Defense Integrated Data System Data Base in Battle Creek, Michigan. Without this support, SMB would have to mail the punch cards to Battle Creek.
